

GAURAV OJHA

Computer Science (IoT) Undergraduate · Python Developer · Data Science Enthusiast

gauravo3010@gmail.com | +91 8959896989 | Vidisha, Madhya Pradesh, India

CAREER OBJECTIVE

Motivated B.Tech (CSE-IoT) undergraduate at SATI seeking internships in Data Analytics, Data Science, and Python Development. Skilled in building dashboards, automation workflows, predictive models, and IoT solutions. Passionate about transforming data into actionable business insights and eager to contribute to real-world engineering challenges.

TECHNICAL SKILLS

Languages	Python (Proficient), SQL (Joins, Aggregations), C++ (Basic), Java
Data & Analytics	Pandas, NumPy, Matplotlib, Seaborn, Power BI (Dashboards & KPIs), Excel
Machine Learning	Scikit-learn, K-Means Clustering, Regression Models, Data Preprocessing
IoT & Hardware	Arduino, ESP32, Temperature / Humidity / Distance Sensors
Tools	Git & GitHub, VS Code, Google Colab, Jupyter Notebook, Tkinter, Figma
Concepts	Data Visualization, Predictive Analytics, Customer Segmentation, OOP, Automation

PROJECTS

Sales & Revenue Analysis Dashboard

Personal Project | 2026

- Built an interactive Power BI dashboard featuring KPIs, revenue trend charts, top-product rankings, and dynamic slicers for actionable business intelligence.
- Designed an intuitive layout enabling stakeholders to filter data by region, date, and product category in real time.

Customer Segmentation Analysis

Personal Project | 2026

- Implemented K-Means clustering using Python and Scikit-learn to identify distinct customer groups based on behaviour and demographics.
- Visualised cluster profiles to derive marketing insights and improve targeting strategies.

Predictive Analytics Using Historical Data

Personal Project | 2026

- Developed regression-based forecasting models with full preprocessing pipeline; evaluated accuracy metrics and visualised prediction vs actuals.

Data Cleaning & Reporting Automation

Personal Project | 2026

- Automated data cleaning workflows using Pandas — handling missing values, duplicates, and outliers — and generated scheduled visual summary reports.

Psychometric Calculator

Performance Analyst Company –
Internship | 2024

- Developed a Python + Tkinter desktop application that processes user responses and auto-generates structured PDF reports for psychological analysis.
- Designed the full UI/UX workflow from intake form to downloadable output, significantly reducing manual reporting time.

IoT Monitoring Rover

Smart India Hackathon (SIH) | 2025

- Built an Arduino/ESP32-powered rover equipped with temperature, humidity, and distance sensors to monitor environmental conditions in real time.
- Integrated a live data visualisation dashboard for remote monitoring and automated alert generation.

School Attendance Management System

Academic Project | 2025

- Designed and implemented a Python-based digital attendance tracker replacing manual registers with an automated, query-friendly system.

EDUCATION

B.Tech — Computer Science & Engineering (IoT)

2024 – Present

LEADERSHIP & ACTIVITIES

Tech Head | Rudras Dance Crew – College Cultural Club

2024 – Present

- Lead all technical and creative production for club events — managing video editing, graphic design, and digital promotions.
- Designed posters, social media graphics, and promotional reels, growing online audience engagement.
- Coordinated with performers and event managers to ensure seamless audio-visual execution during live performances.

CERTIFICATIONS & SELF-LEARNING

- Actively pursuing a structured Data Science curriculum covering Python, Pandas, NumPy, SQL, Machine Learning, and Deep Learning via Kaggle, Google Colab, and HackerRank.
- Completed hands-on projects on Kaggle and GitHub to build a job-ready data science and analytics portfolio.
